

Aston Martin AM37 Powerboat

[Off Field](#) / [Recreation](#)

Beauty... This piece of art is a collab between Quintessence, Aston Martin, and Mulder Design. The [Aston Martin AM37 Powerboat](#) is the first powerboat to have Aston Martin's name. This 37-foot speed boat has a carbon fiber cockpit cover, air conditioning, a fridge, and espresso machine that can all be ran with a remote, integrated navigation, control monitor and entertainment systems controlled via a 15-inch touchscreen, and a maximum speed of 44 knots, or 52 in the "S" model. Boom. Just like a James Bond movie.
