Sneak Peek at New Aston Martin of the Sea Concept – the AM37 Powerboat

[Quintessence Yachts](#), in collaboration with *Aston Martin* and *Mulder Design*, unveiled the first details of their upcoming James Bond styled powerboat concept named the AM37. The **Aston Martin AM37 Powerboat** is the first powerboat ever to carry the Aston Martin brand name — and there's high expectations for this rare crossover.

Like Aston Martin automobiles, the AM37 Powerboat is designed from race-inspired composites and carbon fiber, which is visible throughout its innovative design. Other features include air conditioning, a fridge, and espresso machine that can all be started remotely, integrated navigation, control monitor and entertainment systems controlled via a 15-inch touchscreen, and a maximum speed of 44 knots, or 52 in the "S" model. But don't take our word for it, check out the gallery below for exclusive photos of the AM37 Powerboat.
