### More details of AM37 released

Monday, 8 June 2015

By Maarten Janssen

Following the official presentation of the renderings at the Aston Martin HQ in Gaydon in April, a number of revolutionary features of the new AM37 were showcased in the Amani Hotel in Dubai.

The AM37 is the result of an in-depth cooperation between Aston Martin, Quintessence Yachts and Mulder Design. The vessel, which will be available in two distinguished versions, will feature a hi-tech composite structure allied to luxury sports car-like handling, performance and comfort.

One of the most striking features of the AM37 is the sliding deck which allows owners to completely cover the cockpit of the boat. It consists of three carbon panels which can be operated by the electronic command of the AM37 key, folding under the aft deck to uncover the cockpit.

Onboard technologies include the air conditioning, fridge and espresso machine which can all be started on remote while still at home or driving to the marina.

More features related to the performance and innovative technologies of the AM37 will be disclosed at further events in the run-up to the official presentation of the first Aston Martin powerboat this September.

## WORLD'S LARGEST YACHTS

### SuperYacht Of The Week

#### Vica

In October 2014, Italian shipyard Benetti launched their brand new 50 metre superyacht Vica. As a unique project for the shipyard, she is the first Benetti project to join a fibreglass hull with an aluminium superstructure, resulting in maximum design flexibility for customising layouts and style.
