# MORE DETAILS SURFACE ABOUT THE ASTON MARTIN AM37 POWERBOAT

Following the introduction of its advanced project AM37 Powerboat, Aston Martin and Quintessence Yachts have shared more details during the official presentation of the boat renderings at the Armani Hotel in Dubai

## Aston Martin/Quintessence Yachts

**A** M37 Powerboat (<http://luxexpose.com/aston-martin-quintessence-yachts-reveal-the-am37-powerboat/>) from Quintessence Yachts and Aston Martin will see the world in September. On the second official presentation in the Armani Hotel in Dubai, both companies have shared more details as to their innovative project. As it was known before, two versions will be built: the “gran turismo” AM37 leisure powerboat, with twin 520 hp petrol engines and the sporty AM37S with twin 600 hp Mercury petrol engines that can hit 52 knots out of its 370 hp diesels.

It is emerged that AM37 Powerboat will boast an exceptional sliding deck and a set of innovative onboard computer technologies. The unique sliding deck will make it possible to completely cover the cockpit when the boat isn't in use. This special deck incorporates three large carbon fibre panels which can be easily slid back open when the boat is on the water. The deck can also be raised to provide access to the engine room, storage compartments and bimini top.

AM37 onboard technologies complement the singularity of the powerboat. It will include a well-known 15-inch HD touchscreen with advanced multimedia functions and interactive voice control on the dashboard and displays monitoring the engine status and navigation. The air conditioning, fridge and espresso machine can be started on remote while still at home or on the way to the marina.
