### 2 AM37

Aston Martin / Quintessence Yachts

The 11.1 metre Aston Martin AM37 has been created in partnership with Quintessence Yachts. Following years of research and development, the first powerboat to bear the famous Aston Martin wings was given a public debut at the 2016 Monaco Yacht Show.

From a company that has provided cars for James Bond, it is only fitting that the AM37 is both state-of-the-art and super fast. Twin 520hp Mercury Racing petrol engines propel the S version to a top speed in excess of 50 knots.

The Aston Martin speedboat features an innovative sliding hardtop made from carbon fibre and a host of on-board computer technologies. The air-conditioning, fridge and espresso machine can all be turned on remotely, while a 15-inch touchscreen panel and an interactive voice control system run the boat's navigation and entertainment systems.
