VOUCH
A GUIDE FOR THE DISCREETLY WEALTHY

After making its world premiere in Monaco last September, the prototype Aston Martin AM37 powerboat made its state side debut at Yachts Miami Beach on Collins Avenue. Entering its 29th year, the exhibition is home to the largest mega-yacht collection in the world and the unveiling of the first Aston Martin powerboat is set to be one of the highlights of the show.

The Aston Martin AM37 challenges the status quo of the nautical world and offers a pure translation of the brand’s DNA into an entirely new maritime concept, combining innovative technology and bespoke craftsmanship with a perfect balance of design and engineering, performance and comfort, luxury and functionality. The AM37 – which can carry up to eight people – is the ultimate day cruiser, designed and crafted with meticulous attention to detail, superior levels of workmanship and an incredible degree of sophistication. The boats are built at the UK premises of Quintessence Yachts to an extremely high standard.

The sliding deck benefits from unique technology, which allows owners to completely cover and uncover the cockpit of the boat at the touch of a button. The wraparound windscreen is made from a

single piece of sculpted glass fluidly draped over the AM37's foredeck. With its extreme double curvature, the windscreen sets a new industry standard. The 37-foot model is available in two versions – the AM37 with an estimated top speed of 45 knots and a choice of two 370 hp Mercury diesel or two 430 hp Mercury petrol engines, and the AM37S version with an estimated 50 knots derived from its twin 520 hp Mercury petrol engines.
