

ASTON MARTIN *Nautical Debut - AM37*

After two years of research and development luxury automaker, Aston Martin has revealed its latest innovation in technology and bespoke craftsmanship. The prestigious brand marked its entry into the nautical world with the debut of its 37-foot Aston Martin AM37 powerboat at the Monaco Yacht Show last year, and will make its US debut at the Yachts Miami Beach Show. With the partnership of naval architect Mulder Design and Quintessence Yachts, the Aston Martin design team has created a stunning new day-cruiser.

Available in two versions - the AM37 with an estimated top speed of 45 knots and a choice of two 370 hp Mercury diesel or two 430 hp Mercury petrol engines. And the AM37S version with an estimated 50 knots derived from its twin 520 hp Mercury petrol engines.

“AM37 is a pure translation of the Aston Martin DNA into an entirely new maritime concept. The powerboat reflects our values in terms of power, beauty and soul. The most important attribute for Aston Martin is the design language and proportion, we have transferred this DNA into AM37. It was important to us when considering this project to make sure that the boat design was as beautiful and timeless as our cars, the AM37 is a striking boat with fantastic proportion and elegance.” Marek Reichman - Aston Martin’s EVP & Chief Creative Officer.

The AM37 is a day cruiser that can be transformed into an overnight berth by transforming the table into a comfortable bed. The cabin is well appointed with mood lighting and air-conditioning. With

a refrigerator, microwave oven and coffee machine - and a lavatory on board, absolute comfort is guaranteed. Crafted from the finest leathers, elegantly laid out rear seating is available for up to eight people.
